

## Press Release

# AlertEnterprise and North Consulting Group Announce Partnership to Safeguard Critical Infrastructure in Asia-Pacific

Singapore, September 15, 2011 – AlertEnterprise, Inc., a leading provider of security convergence software for Enterprise Identity and Access Management and Critical Infrastructure Protection (CIP), today announced a partnership with North Consulting Group (NCG), empowering NCG to represent, implement and support the AlertEnterprise product suite in South East Asia and Hong Kong.

NCG is a leading consulting firm in the area of Critical Infrastructure Protection and Asset Security. NCG will leverage AlertEnterprise's innovative security convergence technology for Critical Infrastructure Protection. Customers will benefit from the industry's leading solution to safeguard critical infrastructure against threats, theft, sabotage and terrorism.

"The partnership with NCG will enable us to accelerate our growth in Asia Pacific," says Christoph Theisinger, Vice President and Managing Director for the Asia-Pacific and Middle East regions at AlertEnterprise. "Emerging best practices and standards for critical infrastructure protection are driving convergence between IT security, Physical Access Control Systems, Video Surveillance and Operational Technology. Customers are seeking both technology and advisory on how to strengthen the protection of critical infrastructure within their organizations. Together, NCG and AlertEnterprise will be delivering state-of-the-art solutions and services to safeguard critical infrastructure in South East Asia."

"AlertEnterprise was designed with the vision of convergence between logical and physical security systems," adds Andy Waroma, Partner and Chief Architect at NCG. "There is tremendous interest especially in the utility, oil and gas and public sector industries. To secure their critical operating assets, organizations need to integrate logical and physical security. AlertEnterprise is addressing this requirement with a single solution, leveraging existing investments in security infrastructure. We are excited about working with AlertEnterprise to deliver best practices and implementation services for this innovative technology to our joint customers."

### About AlertEnterprise

AlertEnterprise security convergence technology delivers Enterprise Identity and Access Management software to automate on-boarding / off-boarding, and deliver active policy enforcement for true prevention of theft, sabotage and acts of terrorism. In addition to providing complete risk analysis prior to provisioning access for employees and contractors, AlertEnterprise uniquely eliminates silos and uncovers blended threats across IT security, Physical Access Controls and Industrial Control Systems. AlertEnterprise delivers multi-regulatory compliance management for utilities, airports, federal agencies and other industries, as well as situational awareness with command and control capabilities for effective response to critical threats and protection of critical infrastructure.
